

AUTOMATIC HYGIENE SYSTEM

Hygiene through continuous maintenance with customised programming giving total control

- Quadrasan® is the most effective system for automatic W.C. and urinal maintenance
- Continuous programmed delivery ensures W.C. and urinal fixtures remain clean, sanitized and odour free

REFILL OPTIONS

Refills are available in chemical and biological formats. Both formats are available unfragranced or with a choice of fragrances compatible with the Airoma® range.

Quadrasan – 300

A concentrated cleaning and sanitizing formulation that produces good foaming action, counteracts the formation of scale and attacks malodours at source.

Biosolve – 300

A complex biological formulation containing powerful cleaning agents and bacterial strains selected for their ability to digest waste materials preventing the formulation of scale and organic build-up. (This option is particularly suitable for use in conjunction with Water Management Systems).

Typical W.C. installation

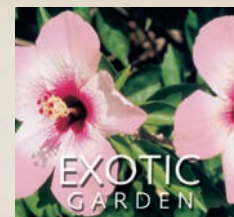

Typical urinal installation

- Quadrasan® -300
- Biosolve™ -300 unfragranced

- Quadrasan® -300F
- Biosolve -300F CITRUS TINGLE
